An alternative way to experience the culture of winegrowing and wine in Navarre

Housed in a 17th century historical building close to the Royal Palace of the medieval town of Olite, in central Navarre, ENOZENTRUM will allow you to discover the winegrowing culture of our region while you enjoy this unique space.

A space supported by walls built in another century, which now offers some modern facilities that will allow you to enjoy an immersive experience in the vineyard, winery and winegrowing culture, thanks to its **three audiovisual rooms** featuring five-metre-wide screens that you yourself can control using a **tablet**, **360 virtual reality glasses** and **showcases with integrated screening**. All this is accompanied by a number of information panels.

Subject to booking and only if you visit the centre, you can round off this experience **with a wine tasting session*** while you learn about our sector or, weather permitting, relax in a pleasant outdoor area.

If you're coming with children, you can also enjoy the vineyard with the help of **UVALUBA**, a cartoon specially created for youngsters.

Come, discover and, above all, enjoy!

*Wine tasting session times:

Summer - 1 June to 30 September
13:00 and 18:00

Winter - 1 October to 31 May
13:00
